## Section 5: Fire and Explosion Data

**Fire:** Not expected to be a fire hazard.

**Explosion:** None identified.

**Fire Extinguishing Media:** Water, dry chemical, foam or carbon dioxide.

### **Special Information:**

Firefighters should wear proper protective equipment and self-contained breathing apparatus with full facepiece operated in positive pressure mode.

## Section 6: Accidental Release Measures

Take up by mechanical means (avoid dust formation) and place into sealed containers for adequate disposal. DO NOT allow to enter in the sewage or ground waters. Wash contaminated area well with soap and water.

## Section 7: Handling and Storage

Store at room temperature. Keep containers tightly closed and dry. Avoid contact with skin and eyes. Avoid dust formation. Store in a dry area. Material is hygroscopic. Use with adequate ventilation. Keep container closed.

Wash thoroughly after handling. Containers of this material may be hazardous when empty since they retain product residues (dust, solids); observe all warnings and precautions listed for the product.

## Section 8: Exposure Controls/Personal Protection

**Airborne Exposure Limits:** None established.

### **Ventilation System:**

A system of local and/or general exhaust is recommended to keep employee exposures as low as possible. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. Please refer to the ACGIH document, Industrial Ventilation, A Manual of Recommended Practices, most recent edition, for details.

## Section 8: Exposure Controls/Personal Protection (Continued)

### Personal Respirators (NIOSH Approved):

For conditions of use where exposure to the substance is apparent and engineering controls are not feasible, consult an industrial hygienist. For emergencies, or instances where the exposure levels are not known, use a full-facepiece positive-pressure, air-supplied respirator. **WARNING:** Air purifying respirators do not protect workers in oxygen-deficient atmospheres.

### Skin Protection:

Wear impervious protective clothing, including boots, gloves, lab coat, apron or coveralls, as appropriate, to prevent skin contact.

### Eye Protection:

Use chemical safety goggles and/or full face shield where dusting or splashing of solutions is possible. Maintain eye wash fountain and quick-drench facilities in work area.

### Other Control Measures:

There is insufficient data in the published literature to assign complete numerical SAF-T-DATA\* ratings and laboratory protective equipment for this product. Special precautions must be used in storage, use and handling. Protective equipment for laboratory bench use should be chosen using professional judgment based on the size and type of reaction or test to be conducted and the available ventilation, with overriding consideration to minimize contact with the chemical.
